

WE LOVE A CONCRETE CHALLENGE

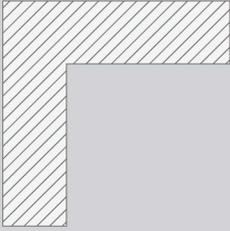

# STRENGTHENING INFRASTRUCTURE

**Robust, safe, and efficient infrastructure starts with precision-engineered formwork. Hendriks Formwork Solutions provides high-performance formwork systems for tunnels, bridges, and large-scale construction projects worldwide, designed for short construction lead times, consistent quality, durability, and reliability.**

**HENDRIKS**  
FORMWORK SOLUTIONS

## Features

- **Flexibility:** Any shape is possible, fully tailored to your construction method.
- **Architectural finish & design:** Our steel face plates ensure a super-smooth concrete finish with architectural-grade quality and a clean surface. All designs can be executed. Thanks to innovative 3D shaping of the steel skin, an exceptional level of detail is achieved.
- **Optimal strength:** Advanced 3D FEM calculations guarantee compliance with concrete class and deflection requirements, with margin. Extremely suitable for heavy transport, to carry even the heaviest of loads.
- **Efficiency:** Minimal joints and no panel changes enable a fast, dimensionally accurate construction process.

Whether you're facing tight deadlines, intricate designs, or extreme site conditions, our team is ready to push the limits of what's possible.

**We love a challenge!**
